

Standard Industrial **WEIGHING PLATFORM**

WP
Series

- Capacities from 300kg to 3000kg
- Standard Sizes: 600 x 600mm
to 1500 x 1800mm
- Robust Construction
- OIML-Approved Load Cells Used
- Sealed to IP65
- 3 YEAR WARRANTY

Options Available

Mild Steel or Stainless Steel Construction

Ramps

Pit mounting versions

Can also be supplied as a 'U' Frame or as two Weighbeams

Trade approved versions available

DESCRIPTION

The WP series of Industrial Weighing Platforms have been designed to withstand the demands of continuous use in industrial environments.

The platform construction takes out the headaches that can occur when taking off the shelf load cells and trying to incorporate them in to a weighing platform. The design uses four OIML-approved high accuracy shear beam load cells sealed to IP67, with an overall scale rating of IP65.

A number of different options make the WP series extremely versatile, making the different platform configurations almost endless, and therefore we can achieve the requirements of most applications.

Our wide range of digital indicators and signal conditioners are available to compliment the WP series of platforms. For more detailed discussions or advice on the correct platform configuration please contact our Sales Team.

SPECIFICATION

STANDARD SPECIFICATION - MILD STEEL MODELS

Durbar top plate with a hammer spray paint finish. Fitted with four stainless steel OIML-approved load cells sealed to IP67 and self absorbing, heavy duty rubber mounting feet.

STANDARD SPECIFICATION - STAINLESS STEEL MODELS

Stainless Steel construction with smooth top plate. Fitted with four stainless steel OIML-approved load cells sealed to IP67 and Stainless Steel free motion feet..

OPTIONS:- Specially dimensioned platforms to suit your specific application.
Economy versions for tighter budgets

STANDARD PLATFORM SIZES

600mm x 600mm
800mm x 800mm
1000mm x 1000mm
1000mm x 1250mm
1250mm x 1250mm
1500mm x 1250mm
1500mm x 1500mm
1800mm x 1250mm
1800mm x 1800mm
2100mm x 1500mm

CAPACITY OPTIONS

300kg x 0.1kg increments
600kg x 0.2kg increments
1500kg x 0.5kg increments
3000kg x 1kg increments

ACCURACY

1 part in 3000 (0.03% of capacity)

OUTPUT

2.0mV/V nominal

BRIDGE RESISTANCE

100 ohms nominal
